DETAILED ACTION

Information Disclosure Statement

The information disclosure statement filed on 1-31-01 does not fully comply with the requirements of 37 CFR 1.98 because the Madou reference does not have a publication date. Since the submission appears to be *bona fide*, applicant is given **ONE (1) MONTH** from the date of this notice to supply the above mentioned omissions or corrections in the information disclosure statement. NO EXTENSION OF THIS TIME LIMIT MAY BE GRANTED UNDER EITHER 37 CFR 1.136(a) OR (b). Failure to timely comply with this notice will result in the above mentioned information disclosure statement being placed in the application file with the noncomplying information **not** being considered. See 37 CFR 1.97(i).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Wolfgang et al. (SPIE Vol. 2906, Microrobotics: Components and Applications). With respect to Claims 1 and 3-8, Wolfgang et al. teaches a supply area (Figure 6, Stock); a pick and place machine that picks and places the components to the work area (abstract and Section 5, first paragraph); and an aligner that characterizes the positions of the components on the bench and mechanically adjusts

Art Unit: 1725

the relative position (section 5.3, paragraphs 1-4); an aligner that activates/energizes a workpiece and detects an optical signal and adjusts the components (Section 5.3, Paragraphs 1-4 and Figure 9a, measuring system); and a two jaw gripper (Figure 9a, gripper). It is the examiner's position that how the system operates is a process limitation that holds little patentable weight in an apparatus claim.

With respect to Claim 2, the teachings of Wolfgang et al. are the same as relied upon in the rejection of Claim 1. Wolfgang et al. teaches laser welding (abstract and Figure 4, laser). It is the examiner's position that how the components are secured are process limitations that hold little patentable weight in an apparatus claim.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jonathan Johnson whose telephone number is 703-308-0667. The examiner can normally be reached on M-Th 7AM-5:30 PM.
